

110 Pocket Cutter Machine

Create Castle low-angle, professional pockets in seconds with the Castle 110 Pocket Cutter. The 110 cuts our exclusive low-angle, 3 degree pocket, makes fast, strong, and attractive joints for cabinets, bookcases, face frames, and other woodworking projects while minimizing joint misalignment common with a drilled pocket.

Since the screw's pilot hole is drilled from the opposite side, there is no accumulation of waste or tear out which allows joined pieces to fit as tightly as possible.

FEATURES AND BENEFITS INCLUDE:

- 3 Degree Pocket minimizes joint shift
- Stronger joints and faster assembly
- Portable and adjustable
- Super clean pockets with no tear out
- Factory assembled and adjusted. No additional setup required.
- Designed and assembled in the USA from US and global components.
- Castle Pockets have smooth clean finishes and join seams flush, minimizing shift.
- Easy to adjust clamp height
- Easy to align and cut perfect pockets every time

(The Castle 110 is our update to the Castle 100, which is no longer in production)

Includes:

- Overlay plate for quickly machining thinner materials (Part C11001)
- Bit Set-up Block with integrated bit height gauge (Part C11010)
- Collet Wrenches (Part K11000)
- T20 Torx driver bit, 6" round shaft (Part B00620)
- Smooth Router Bit (Part B02516) [installed and factory adjusted for 3/4" stock]
- Extra long (6") 5/32" drill bit for pilot hole (Part B06532)
- Box of 250 count, 1-1/2" Torx Hi-Low pocket screw (Part B04112-0250)
- Box of 250 count, 1-1/4" Torx Hi-Low pocket screw (Part B04114-0250)
- Operator Manual with Warranty Activation Card

Optional:

- Work Stop Set, includes stop bar, left and right work stops [Part C11060]
- Roughing Cutter for extra dense/hard hardwoods [Part B02517]
