**Castle USA Hires Chris Waller as CSI-1.5D Product Manager**

**Petaluma, CA (January 5, 2022)** [Castle USA](#) has just named Chris Waller as Product Manager. Waller will be managing development, sales and service for the CSI 1.5D Pocket Cutter/Screw Inserter Machine. Widely respected as a leading manufacturer of commercial and professional pocket cutting machinery, face assembly tables and tooling, Castle's [CSI 1.5D](#) cuts Castle's distinctive, low-angle screw pocket, drills a low-angle pilot hole and inserts a flush screw - all in 1.5 seconds. CSI 1.5D provides stackable parts in faster production times by eliminating screw handling at assembly.

"We're thrilled to have Chris join the team here at Castle," says Mathias Forsman, CEO. "His experience and success in sales and enthusiasm for positive customer engagement will help new and existing CSI 1.5 customers increase their efficiencies and profits."

Waller comes to Castle from Tigerstop, where he was Regional Sales Manager.

*Chris Waller, Castle USA's new Product Manager*

"Castle has an outstanding and well-deserved reputation for making great products, so I'm thrilled to join the team here," says Waller. "The [CSI 1.5D](#) is a game-changer for any manufacturer who does high-capacity joinery and I'm really looking forward to assisting our existing CSI customers and increasing the market awareness of the CSI overall."

Waller's initial focal point will be on launching Castle's new "Try it First" CSI 1.5D initiative. Customers will now be able to try the CSI 1.5D for two months without having to pay for the machine.

To contact Chris Waller for more information about the CSI 1.5D and the "Try It First" program, please email him at [chrisw@castleusa.com](mailto:chrisw@castleusa.com)

## **About Castle USA**

Castle USA is an American machinery manufacturer championing the cause of the entrepreneurial woodworker since the 1980's. Castle products are assembled in the USA, using USA-made and globally sourced components. Their product offering includes a superior line of "Castle low-angle" pocket hole cutters, face frame assembly tables, and a variety of tooling. Castle users include large scale manufacturers and small, professional, cabinet and woodworking shops as well as hobbyists and DIYers. Each Castle product is designed to increase productivity as well as the quality of the work result. Products are sold directly through [www.CastleUSA.com](http://www.CastleUSA.com) as well as through a network of dealers.
